

Dr Akhil Biju

Designing calm, trustworthy software for high-stakes work.

Bangalore, India +91 6282830761 akhiloscar@gmail.com drakhilsfolio.vercel.app [linkedin.com/in/dr-akhil-biju-uxui-design](https://www.linkedin.com/in/dr-akhil-biju-uxui-design)

Product designer with 3+ years shipping end-to-end experiences for complex, high-stakes domains — care-management consoles, clinical imaging, NHS workforce scheduling and legal-AI compliance. Leads the full design cycle from research and heuristic evaluation to information architecture, interaction design, design systems and developer-ready handoff, working closely with product and engineering at a fast-moving startup.

SELECTED WORK Tachyon Care · Pictoral Dental · Shift Partner · Casey · ZenGolf

PORTFOLIO drakhilsfolio.vercel.app — fantasy-game-inspired portfolio, art-directed, designed and built solo using Figma, Claude Code and VS Code.

EXPERIENCE

Product Designer (UX/UI) — Rugas Technologies Pvt Ltd, Bangalore

Aug 2023 - Present

Designer at a product startup, owning UX for 10+ client products across healthcare, legal-AI, enterprise SaaS and Web3. Reporting to the Product Manager and working directly with developers — from research and IA through high-fidelity prototypes, specs and build QA.

■ Tachyon Care · Geriatric & chronic care platform · HIPAA / DPDP

- Designed 3 provider-side consoles serving 5 user roles — Provider Care (doctors), Care Coordinator (nurses) and Organisation Admin — around a risk-first RED/AMBER/GREEN model, with care plans, care calendar, adherence, vitals, escalations and messaging.
- Designed Tachyon Rex, an AI clinical copilot that explains every recommendation (reason, expected outcome, action) and never changes a care plan without clinician confirmation.
- Built 1 shared HIPAA/DPDP privacy kit reused across all 3 consoles: versioned consent templates (7 consent types, 8 data scopes), scoped caregiver access and billable clinical-time tracking.
- Benchmarked 7 ambient-monitoring competitors and identified 18 feature gaps, defining the roadmap scope for a sensor-based resident monitoring module.

■ Pictoral Dental Software · Clinical imaging platform · Lead Product Designer

- Owned product vision, system architecture and end-to-end UX for an AI-assisted imaging platform, mapping the imaging → diagnosis → reporting workflow to real clinical protocols.
- Designed clinical dashboards, patient history and treatment timelines, and a reporting engine with customisable templates, annotations and multi-format export.
- Made AI image filters (contrast, noise reduction, anomaly highlighting) approachable through progressive disclosure, contextual tooltips and guided walkthroughs for novice and expert clinicians.

■ Shift Partner / Bankshift · NHS staff-to-shift matching · Lead UX Designer

- Ran a heuristic evaluation (Nielsen + healthcare usability principles) and task analysis with clinical staff; restructured navigation, search and filters — improvements accepted by the client and shipped.
- Redesigned the staff mobile app end to end for Skills 3.0 — 10-step sign-up, planner, capability → competency → skill hierarchy, mastery levels (Solo / Distant / Direct) and a skill-match score on every shift — on a 20-component shared library, with 14 standardised shift statuses and a full app flow map handed to developers.

■ **Casey** · Enterprise legal-AI compliance platform

- Designed the Compliance Console (reviewers) and Evidence Portal (client contributors) as 2 connected apps sharing one live audit dataset — audits against playbooks, evidence requests, guided response wizard and reports.
- Designed Horizon Scanning, which monitors legislation and regulatory guidance by topic and jurisdiction with subscribable alerts; authored the IA, PRDs, UX audit and a design system extracted from the production prototypes.

■ **ZenGolf** · Web3 peer-to-peer golf betting

- Designed step-by-step wallet onboarding, betting rooms, real-time scoring and smart-contract-backed leaderboards that communicate fairness without exposing blockchain complexity.

■ **Smart Slot** · **Zymerz** · **Viewmo** · **Karma Tickets**

- **Smart Slot:** scheduling and resource-allocation dashboards balancing automated optimisation with manual control.
- **Zymerz:** information architecture and progressive disclosure for a healthcare data platform, surfacing critical patient data first.
- **Viewmo:** scalable dashboards and centralised control for a digital signage platform.
- **Karma Tickets:** booking flow revamp for clearer navigation and conversion.

■ **Rugas Technologies website & CardiaBridge** · Brand and marketing design

- Designed the Rugas brand identity and a scroll-driven company homepage for healthcare, legal and regulated-enterprise buyers; produced a print-ready vector artwork pack (lid sticker, serialised device labels) for the CardiaBridge hardware device.

UX Researcher — Blue Mandarin

2023

- Designed the Deutsche Aligners dental management portal for clinics and labs — admin dashboards, case workflows and information architecture.
- Wrote detailed user stories and established reusable patterns to align design and development.

SKILLS

DESIGN Product UX Strategy, Interaction Design, Information Architecture, Workflow Design, Design Systems, Prototyping, Responsive & Mobile UX, Accessibility (NHS), Privacy-by-Design (HIPAA / DPDP), AI Copilot UX, Brand Identity

RESEARCH Usability Testing, Heuristic Evaluation, Task Analysis, User Interviews, Competitive Analysis, PRDs & User Stories, Design Thinking

TOOLS Figma, Miro, Affinity, Claude Design, Claude Code, VS Code, Panda, ChatGPT

DOMAINS Healthcare & Clinical Systems, Legal-AI & Compliance, Enterprise SaaS, Workforce Scheduling, Web3

EDUCATION & CERTIFICATIONS

UX/UI Design Certification — School of Accelerated Learning (SOAL)

2022

Graphic Design Certification — CareerFoundry

2021

Bachelor of Dental Surgery (BDS) — Vinayaka Mission University

2014 - 2021
